

## Dept. of Xcultural Studies

Due to the fact that the administration of this cooperative course is based on the cooperation of professors who have similar ideals and interests and the cooperation of related majors, students are able to step outside the boundaries of their own major and take advantage of the available resources to the fullest. Also, by strongly encouraging cross registration of credits and the involvement of professors from other universities, the program's sound and practical quality of education is unparalleled to any other universities that offer a single subject graduate school program.

The Xcultural phenomenon that this program is based on is a phenomenon that occurs all around us without our knowing. Therefore, various major fields that are involved with our lives participate in this cooperative program, with the belief that academic subordination is inevitable without introspection of "our lives" and that true globalization can be achieved only when "our lives" and "their lives" combine and form the "life world."

The curriculum for individual students can be composed freely while sharing the above mentioned points in prospective. The curriculum will be selected and developed with the help of the advisor according to each student's interest. Also, in order to widen the platform of the shared interest, the effort to develop research methods and acquire practical techniques will simultaneously be carried out.
